Getting Under The Skin by
Gillian Webster, M.Inst.Ch.P.
28. CPD Information
30. Branch News
33. Classified
34. Diary of Events
- 36 National Officers

Dear Reader

Traditionally this issue of Podiatry Review is concerned with giving you, the reader, a flavour of our A.G.M., conference, lectures, dinner dance and the chiropodial and medical trade show.

This year, the 56th A.G.M. etc was held at Beaumont House Windsor, which had extensive grounds and superb facilities. It engendered a learning atmosphere at the lectures and a fun time at the dinner dance. See the letters and photographs herein.

Now, what is of interest and note in this issue of Podiatry Review? Firstly part 2 of Ivan Bristow, from Southampton University, and colleagues' treatise, Clinical Guidelines for the recognition of Melanoma of the Foot and Nail.

I have put in notes on Patricia Pope's RGN lecture on dementia, which I found fascinating. It was well worth the trip to the Windsor conference for those lectures alone.

The pull-out CPD section is on Haematology by Judith Barbara-Brown, MSc BSc(Hons) PGCE D Pod M MChs, for which once again we thank her. Judith was presented with the Basham prize at our conference and well deserved it.

South Wales branch member, Gillian Webster, has given us an account of her 'day in a dissection lab' which I found interesting and am sure our readers will do also. Thank you Gillian. We always welcome articles, news, anecdotes from our members, if any of you wish to write in please do so.

The peer-reviewed articles in this issue are:

- Designing a Clinical Audit, waste in the manufacture of chairside orthotics by Deirdre O'Flynn.
- Primus Metatarsus Supinatus, also called Rothbarts Foot, by Brian A. Rothbart, DPM, PhD, DNM.

So I think you could say that there is something for everybody in this issue of Podiatry Review.

I am going on holiday tomorrow, so keep your fingers crossed for nice weather.

All the best

Roger Henry
Editor, Podiatry Review
